SUMMARY

Backend-focused software engineer with 1+ years of production experience in Python/Django and TypeScript. Built the backend for a real-time sports app with 10K+ downloads, co-built an offline-first clinic desktop app and delivered LLM-powered business automation; currently the sole backend engineer on a live B2B/B2C system for a freelance client.

TECHNICAL SKILLS

Languages	Python, TypeScript, JavaScript, SQL
Backend	Django, Django REST Framework, Celery, Django Channels, WebSockets, REST APIs
Frontend & Desktop	Next.js, React, Angular, Electron, Tailwind CSS
Databases	PostgreSQL, Redis, SQLite, MongoDB
DevOps & Tools	Git, GitHub Actions, Docker, Nginx, Linux, Cloudflare, AWS Cognito, Firebase
Automation & AI	n8n, LLM APIs, AI agents, human-in-the-loop workflows, SaaS API integrations

EXPERIENCE

Freelance Software Engineer <i>Advergo Sports & Fashion Wear Ltd.</i>	Jul 2026 – Present <i>Remote</i>
- Sole backend engineer and frontend contributor for a sportswear manufacturer's live B2B custom-order and B2C retail system (advergo.org) built with Django, Next.js and PostgreSQL; retained for phase two - Designed a modular Django backend (65 REST endpoints) and quote-to-invoice flow with automated PDFs - Added role-based access, admin 2FA and audit trails; built a CI/CD pipeline running 244 automated tests	
Software Engineer Intern <i>Factoryze Technologies Limited</i>	May 2026 – Present <i>Dhaka · Hybrid</i>
- Automated short-term-rental guest onboarding in n8n across Jurny, Autohost, Monday.com and QuickBooks - Built LLM-based email triage for Gmail and Outlook, sorting a property manager's inbox into 8 categories - Developed LLM reply drafting with human approval in Telegram, supporting revision rounds and full logging	
Junior Backend Developer <i>Join Venture AI</i>	Dec 2025 – Feb 2026 <i>Dhaka · On-site</i>
- Sole backend engineer for ScoreLivePro, a live football app on Google Play (10K+ downloads) and App Store - Implemented live updates that sync match data every 15s via Celery and push over WebSockets and Firebase - Reduced paid sports-API calls through targeted fetching and shipped CI/CD with GitHub Actions and Docker - Built and maintained Django backends for multiple international client products, covering REST APIs, third-party integrations and production fixes; coordinated with clients across time zones	
Junior Software Engineer <i>MADD Technology</i>	Aug 2025 – Nov 2025 <i>Dhaka · On-site</i>
<i>Software Engineer Intern</i>	<i>May 2025 – Jul 2025 · Remote</i>
- Developed features and fixed API, database and scheduling issues across multiple company products - Co-built the Neeramoy desktop app (Angular, Electron), letting doctors run their clinic fully offline - Designed its SQLite data layer and sync engine, reconciling offline records with the cloud on reconnect - Published neeramoy-sdk on npm, a typed TypeScript API client with AWS Cognito OTP auth	

EDUCATION

American International University-Bangladesh (AIUB) <i>B.Sc. in Computer Science & Engineering, Major in Information Systems</i>	Dhaka, Bangladesh <i>May 2022 – Sep 2026</i>
